# **Enviromental Requirements**

Power Source	AC220V / AC380±5% :3 Phase 50/60Hz±1Hz
Temperature	20±1°C or 25±1°C; less than 75%RH
Enviroment	<ol> <li>The machine should not be placed near punching machine,drilling machine or any interfering sources.</li> <li>The machine should not be placed near heat treatment or electroplate systems.</li> <li>The machine be placed in an airtight room to keep dust out.</li> <li>Before machine positioning, pay attention to machine movement during operation and the space needed for maintenance.</li> <li>Solid foundation of horizontal error should be less than 20µm.</li> </ol>
Earth construction	Earth resistance below $10\Omega$ : separate the earth terminal with other machines.
Pneumatic pressure	6 kg/cm <sup>2</sup> (Applicable for machine with AWT system)

\*All the specifications are subject to change without prior notice.

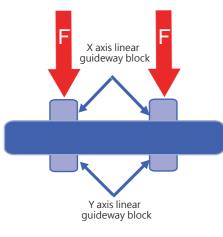

GA 43AL

## **High-Rigidity Structure**

GA series has "Direct Force" design on the concept of X/Y axes linear guideway blocks keep staying in straight line. Working tabe is supported by casting bases. GA series is suitable for the precision mold cutting within small / medium stroke.

Machine structure was designed via Finite Element Analysis (FEA) with high rigidity.

## Windows CE Controller

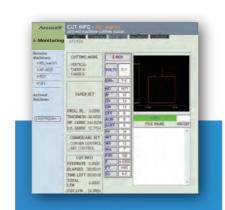

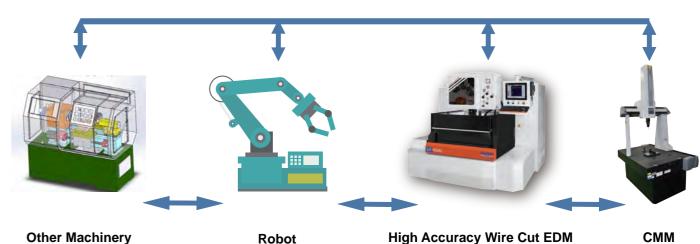

AccuteX controller is 100% self-developed by core-technologies of R&D team. We can provide the best support in any modifications. AccuteX controller is based on Windows CE system. It features "Precise Motion Control" with rapid servo response. Also, Windows CE system is virus free environment to assure system stability.

## i-Monitoring (\*Optional)

You can monitor the status of AccuteX machine via smartphone and tablet anytime.

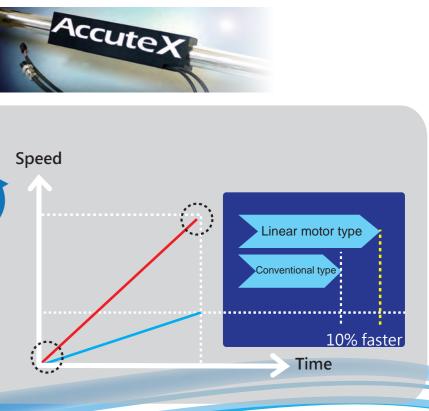

AccuteX machine is capable with industry 4.0 who has M2M (machine to machine) protocol to collaborate with Robots and other machines. Flexible Real-time production can be made by Intelligent Manufacturing Integration System to meet full-automation demand.

## **Linear Motor**

New generation shaft-type linear motor is self-developed by AccuteX. It features with closed loop control by 0.2µm resolution linear scale and backlash free to keep accuracy. Rapid servo response can improve cutting efficiency up to 10%. AccuteX linear motor has excellent lower power consumption to keep constant working temperature.

Improving Cutting Performance Rapid servo response prevents wire breaking and increases cutting speed. New Generation shaft Linear Motor Lower maintenance cost. Excellent low power consumption characteristics. Flat Type Linear Motor

Rotary Motor

CIMFORCE Industry 4.0 Intelligent Manufacturing Integration System (\*Optional)

Industry 4.0- Intelligent Manufacturing Integration System

### **High Accuracy Wire Cut EDM**

CMM

## **Ultra Resolution Signal Processor**

Linear scale interpolation board with ultra resolution to achieve smoother velocity and stabilize position control. Standard resolution is 0.2µm.

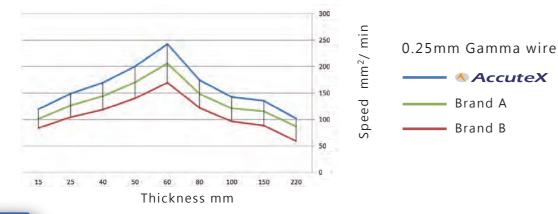

20µm 20nm Performed

Standard scale can narrow down to 20nm.

## **Cutting Efficiency Comparison**

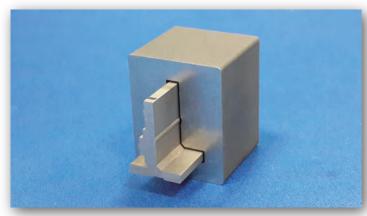

AccuteX has simplified the generator and electric circuits to eliminate unnecessary power loss and improve the cutting efficiency.

Speed comparison table with other brands in different thickness of workpieces.

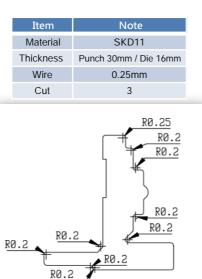

## **Corner Control Function**

According to different wire diameters, corner angles, arc radius and thicknesses, AccuteX controller optimizes parameters for the best cutting efficiency with high accuracy. Especially on the small path and continuous corners, machines can meet the corner accuracy demand.

The complex stamping mold has fine 3µm tolerance with average 1mm height of cutting edge.

## **Rotary Table Package (\*Optional)**

Vertical mode

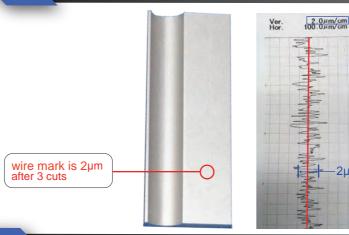

Auto Wire Threading (\*Optional)

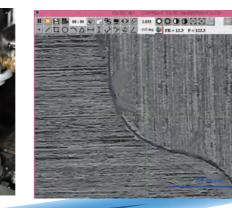

- tension while wire breaks.
- the wire at the same time.
- wire to the collection cabinet, quick and easily.

# New Lead-In / Lead-Out Control

Accutex Rotary Table Package is leading ahead of other WEDM manufacturers by years in R&D which can be applied to submerged operation.

The Built-in Type Motorized Spindle features ultra-high resolution 720,000 pulses each revolution, free of backlash problems.

>"AC servo tension wheel", tension control during cutting, featuring reverse

>"Wire End Needle-Shaping", while the wire is cut off by electricity, the reverse tension and annealing heat treatment are applied to strengthening

>"Waste Wire Auto Removing Device " by air blow system to remove waste

New generation of Lead-In / Lead-Out function is available for Tungsten Carbide. The wire mark is 2µm after 3 cuts by 40mm thickness which improving mold quality and saving second time polishing hours.

AccuteX machine can be equipped with 3µm precision CCD camera to have optical on-line measuring ability. It can make sure the cutting accuracy by profile comparing without workpiece unloading.

### **Cutting Samples**

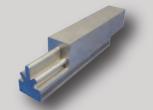

## **Continuous Corner**

- Keeping equal tolerance 3µm in continuous corner.
- Continuous radius is 0.18mm Short path is 0.207mm.

Material	SKD11
Thickness	Punch 50mm Die 30mm
Wire size	0.25mm
Cut	3

### **Tall Assembly Parts**

 Maximum profile tolerance is 5µm/100mm. The straightness from top to bottom is 2µm/ 100mm.

Material	SKD11	
Thickness	100mm	
Wire size	0.25mm	
Cut	3	

# PCD Application (Optional PCD Graphite power)

- Polycrystalline pelling layer is <5µm by optional PCD power with less grinding hours.
- Clear fit between PCD and carbide connection

Material	PCD
Thickness	1mm
Wire size	0.2mm
Cut	1

# **Stamping Mold**

• The mold has fine 3µm tolerance with average 1mm height of cutting edge.

Material	SKD11
Thickness	Punch 30mm Die 16mm
Wire size	0.25mm
Cut	3

# Lead-In / Lead-Out

- 2µm wire mark on thickness 40mm tungsten carbide after 3 cuts. • Only turn on the function
- without any cutting path modifications.

Material Tungsten Carbide 40mm Thickness

Wire size 0.25mm

3 Cut

### Helical Gear Cutting (Rotary Table Optional)

• Vertical type for rotary table application • Gear diameter is 380mm Material Steel

0.25mm	

High Slenderness Ratio & Complex Profile Assembly Parts
$\sim$

• Stamping mold application. • Maximum tolerance is less than 5µm/80mm.

Material	SKD11
Thickness	80mm
Wire size	0.2mm
Cut	5

## Angle Lifter

• Best tolerance in taper assembly parts.

Material	SKD11
Thickness	30mm
Wire size	0.2mm
Fine Finish	Ra<0.5µm
Cut	3

## **HD** Gear

• Lead-in/Lead-out wire mark is <2µm. The profile deviation of each gear is <5µm.

Material	SKD11	
Thickness	10mm	
Wire size	0.15mm

### Standard Accessories

## **Optional Accessories**

- Transformer
- Auto Voltage Stabilizer
- Water Chiller
- PCD / Graphite Power Module
- S Power Module
- Rotary Table Package (Waxis)
- XY Axes Liner Motor
- 0.2µm Resolution Linear Scale
- Auto Wire Threading (AWT)
- High Pressure Water Jet Threading
- 45Kg Wire Jumbo Feeder
- i-Monitoring
- Remote Master
- GSM Messenger
- Anti-Collision on Z-Axis
- Industry 4.0 Intelligent Manufacturing Integration System
- Safety Door Interlock
- CCD Measuring System
- Machine Status Indicator
- Touch Screen
